

LOGNOTE -- Chief, Operations Group, 22 December 1983

1. [] I called [] at PMCD to ask about the status of the hoped-for cable from the State Department to the field concurring in implementation of the FBN foreign national classification system. [] said he had heard yesterday that State/ITO (of which he did not know the expansion, but which is in charge of the RAMC's) was about to send a message to the RAMC's asking whether they could accommodate the changes necessary to the system. If they answer affirmatively, State will then cable concurrence.
